

POLYESTER 25µ 14 STANDARD COLOURS

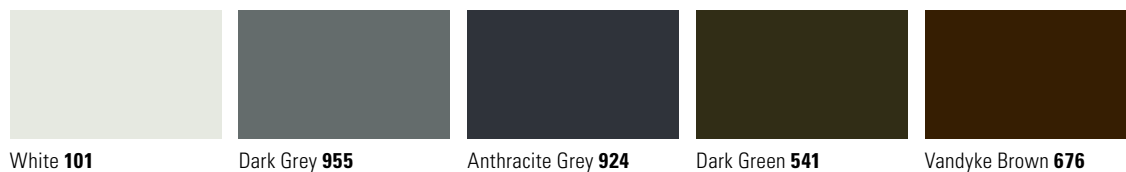

Polyester can be used for almost every application outside in a non-aggressive environment.

PLASTISOL 200µ 13 STANDARD COLOURS

In an industrial environment and near to the sea plastisol is recommended. Thanks to the coating (paint with HPS or leather structure) plastisol is resistant to corrosion. Plastisol protects galvanised steel from scratches and rubbing effects.

LEATHER

HPS

PVDF 25 μ 3 STANDARD COLOURS

PVDF is characterised by an excellent colour fastness. Furthermore, a good resistance to chemicals is provided by PVDF coating.
